

VACANCY

# Ophthalmic Lab Technician

---

Are you passionate about precision and quality? Do you have the skills to craft eyewear that enhances vision and transforms lives? We are seeking a dedicated Optical Lab Technician to join our dynamic team!

## Key Qualities:

### Good Hand-Eye Coordination

Comfortable working with small parts and tools precisely.

### Attention to Detail

Notices small differences and works carefully, especially with measurements and finishes.

### Basic Math Skills

Can comfortably handle measurements, read numbers accurately, and understand decimals/fractions.

### Technical Aptitude

Comfortable learning to use machines or tools. Good with fixing or assembling things.

### Computer Literacy

Familiar with basic software, typing, and navigating systems.

### Willingness to Learn

Shows curiosity, asks questions, and takes feedback well.

### Reliability & Punctuality

Shows up consistently and on time.

### Cleanliness & Organization

Keeps workspace tidy and follows instructions.

### Manual Dexterity

Good with hands. E.g., experience with crafts, mechanics, electronics, or other hands-on work.

### Work Ethic & Focus

Can stay focused on repetitive tasks and complete work without constant supervision.

## The following will be an advantage:

Prior experience in manufacturing, electronics, dental lab work, or precision-based trades. High school certificate with strong science or math performance. Any experience in optics, glasses, or healthcare support

## Working Conditions:

- Requires standing for extended periods.
- Work involves handling small, delicate components.
- Operate in a fast-paced environment while maintaining accuracy and quality.
